

# Regulation on the use of handball resin at CST

## Principle

In principle, the use of resin in handball is not permitted at CST. However, CST can authorise exceptions for national teams.

## Exceptions

Applications for an exception must be submitted to the sports coordinator in advance.

The use of artificial resin may be authorised only in the Vacchini gymnasium in Losone.

Teams using resin bring their own balls.

## Product

Only the artificial resin product "IntenseGrip" should be used at FOSPO/CST. It is provided to guests free of charge, and is dispensed in the CST sports materials store.

## Cleaning

A charge of CHF 350 is invoiced for the additional cleaning work involved.

Should additional cleaning work then still be required, CST will invoice a maximum of CHF 350.
